SUMMARY

AI/ML enthusiast with hands-on experience in building machine learning models and computer vision systems using Python, TensorFlow, and NLP techniques. Skilled in data preprocessing, dataset management, and model optimization. Experience in conducting experiments, analyzing results, and developing scalable ML workflows.

SKILLS

- **Languages:** Python, Java
- **AI/ML:** Machine Learning, Deep Learning, NLP, Computer Vision
- **Libraries:** TensorFlow, Scikit-learn, OpenCV, Pandas, NumPy
- **Concepts:** Data Preprocessing, Feature Engineering, Model Training, Model Evaluation
- **Other:** Data Pipelines, Experimentation, Git, API Integration

EXPERIENCE

- **React Native Developer Intern — DiGrows** 2025
Certificate
 - Assisted in developing applications using React and Node.js with REST API integration
 - Worked on debugging, testing, and improving ML-based systems and backend workflows
 - Collaborated with team members on feature development and testing
 - Gained hands-on experience in full-stack development and real-world projects

PROJECTS

- **AuthenTrack - AI-Based Attendance System** Dec 2024
GitHub | Live
 - Developed a computer vision-based system using face recognition models for attendance tracking
 - Built data preprocessing pipeline for image datasets using OpenCV and Python
 - Trained and evaluated deep learning models using TensorFlow for real-time prediction
 - Conducted experiments to improve model accuracy through data tuning and optimization
- **SheHelp - AI Healthcare Platform** 2025
GitHub | Live
 - Developed machine learning model for PCOD/PCOS prediction using structured datasets
 - Performed data preprocessing, feature engineering, and dataset validation
 - Evaluated model performance and improved accuracy through iterative experimentation
 - Integrated model into application for real-time predictions and insights
- **KrishiOne - Grocery App** Aug 2025
GitHub
 - Built a full-stack application using React, Node.js, and MongoDB
 - Implemented cart, checkout, and API-based data handling
 - Focused on building scalable, reusable UI components and improving frontend performance

ACHIEVEMENTS

- **2nd Position - Dotslash Hackathon** Nov 2024
Certificate
 - * Developed AI-based health monitoring system with NLP chatbot, improving process efficiency by 70%
- **Research Publication - Cybersecurity** May 2025
Certificate
 - * Published research on ML-based detection and prevention of social engineering attacks in IJPREMS journal
